

Conference Venue

National Institute of Technology Puducherry (NITPY),
Karaikal, Puducherry, India
(Virtual participation options available)

International Conference on Data-Driven Approaches to Dynamical Systems and Computational Modeling

15th - 16th May 2026

Organized by:

National Institute of Technology Puducherry

In Association with:

Politecnico di Torino, Italy

Conference Overview

This conference aims to bring together leading researchers, scientists, and practitioners in the fields of dynamical systems, computational modeling, and data-driven approaches. The event will provide a platform for discussing cutting-edge methodologies, trends, and innovations in modeling complex systems across various disciplines.

Key Topics of Interest

- Data-driven techniques for dynamical systems
- Computational modeling in physical and biological systems
- Machine learning applications in system dynamics
- Modeling and simulation of engineering systems
- Nonlinear dynamics and chaos theory
- Big data analytics for system control and optimization
- Stochastic processes in dynamical systems
- Applications in robotics, climate modeling, and other

Registration Details

- **Early Bird:** INR 5,000 (students) — INR 6,000 (academicians/professionals)
- **Regular Registration:** INR 6,000 (students) — INR 7,500 (academicians/professionals)
- **International Participants:** USD 200/ (students) — USD 250 (academicians/professionals)

Organizing Secretaries

- Dr. Naveen Raj R, NIT Puducherry, India
- Dr. Santo Banerjee, Politecnico di Torino, Italy
- Dr. Satishkumar P, NIT Puducherry, India
